Polishing granite

Introduction

A memorial is a lasting tribute that acknowledges the life of your loved one... let us help you to design a memorial that is every bit as special as that person.

Most of us, at some time in our lives, are faced with the painful task of having to choose a suitable memorial for a departed loved one.

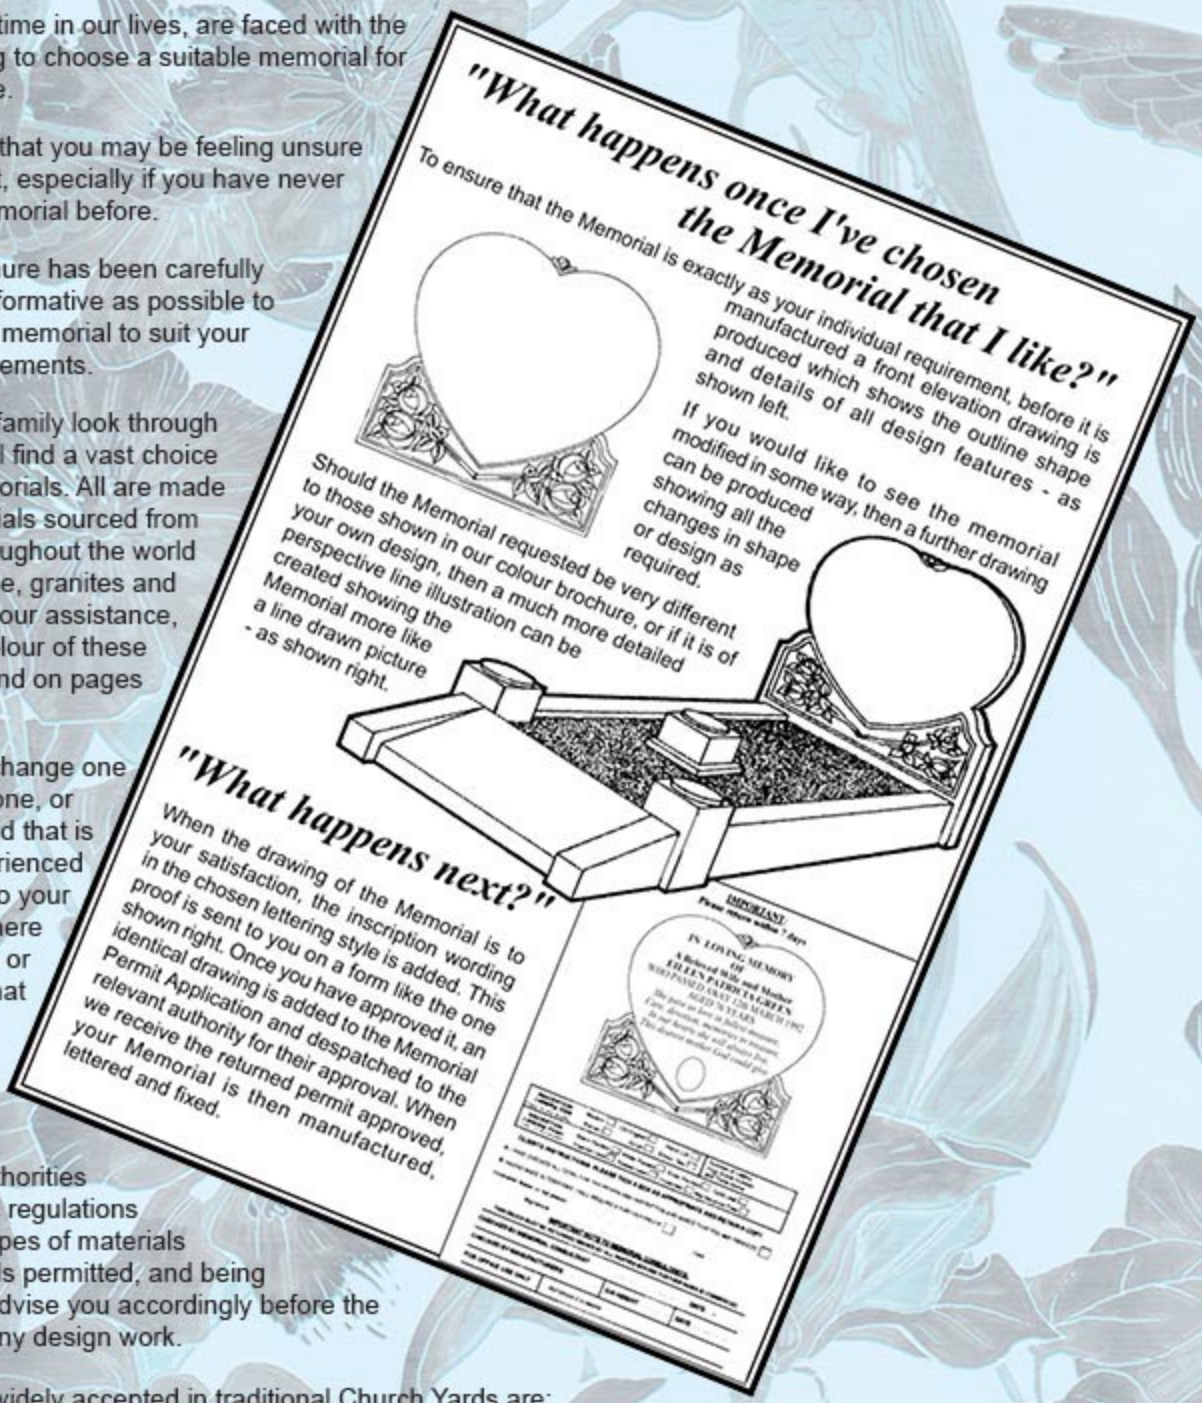
We fully understand that you may be feeling unsure as to what to do next, especially if you have never had to arrange a memorial before.

Therefore, this brochure has been carefully designed to be as informative as possible to help you to decide a memorial to suit your own individual requirements.

When you and your family look through this brochure you will find a vast choice of hand carved memorials. All are made of high quality materials sourced from various quarries throughout the world such as Italian marble, granites and natural stones. For your assistance, a reference to the colour of these materials can be found on pages 20, 21 and 53.

Should you wish to change one design to another stone, or have a design in mind that is not shown, our experienced craftsmen will work to your own specification. There is no limit to the type or style of monument that may be produced.

It should be borne in mind however that all Cemetery and Church Yard Authorities usually have specific regulations which apply to the types of materials and size of memorials permitted, and being aware of these will advise you accordingly before the commencement of any design work.



"What happens once I've chosen the Memorial that I like?"

To ensure that the Memorial is exactly as your individual requirement, before it is manufactured a front elevation drawing is produced which shows the outline shape and details of all design features - as shown left.

If you would like to see the memorial modified in some way, then a further drawing can be produced showing all the changes in shape or design as required.

Should the Memorial requested be very different to those shown in our colour brochure, or if it is of your own design, then a much more detailed perspective line illustration can be created showing the Memorial more like a line drawn picture - as shown right.

"What happens next?"

When the drawing of the Memorial is to your satisfaction, the inscription wording in the chosen lettering style is added. This proof is sent to you on a form like the one shown right. Once you have approved it, an identical drawing is added to the Memorial Permit Application and despatched to the relevant authority for their approval. When we receive the returned permit approved, your Memorial is then manufactured, lettered and fixed.

The materials most widely accepted in traditional Church Yards are:
Nabresina, York Stone, Portland Stone, Slate, Sandstone (as Rainbow Stone and Red Stone), Mid Grey, Glenaby, Karin Grey and Light Grey Granite in honed and sanded finishes.

For your assistance, a reference to the colour of these materials can be found on pages 21 and 53.

Every stage of your memorial is fully guaranteed, from the design and planning service through to the high quality of workmanship of your finished memorial and of course the essential element of precise installation.

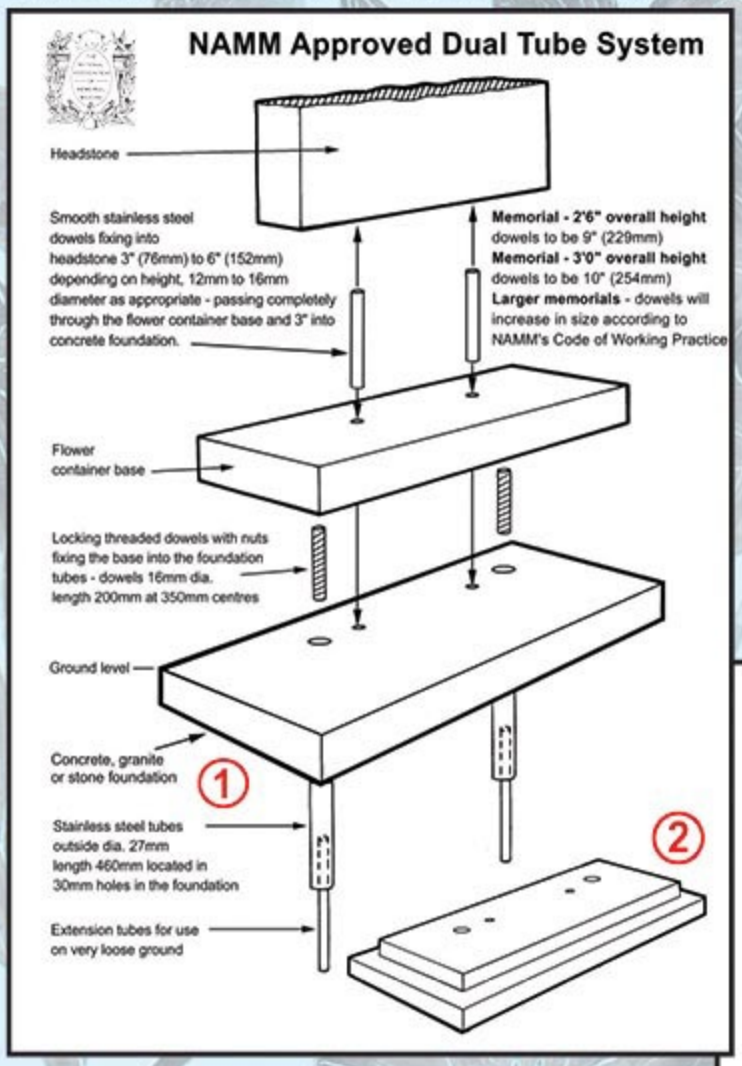
All of our concrete bases are polished and reinforced, manufactured to British Standards BS8500 for your complete piece of mind.

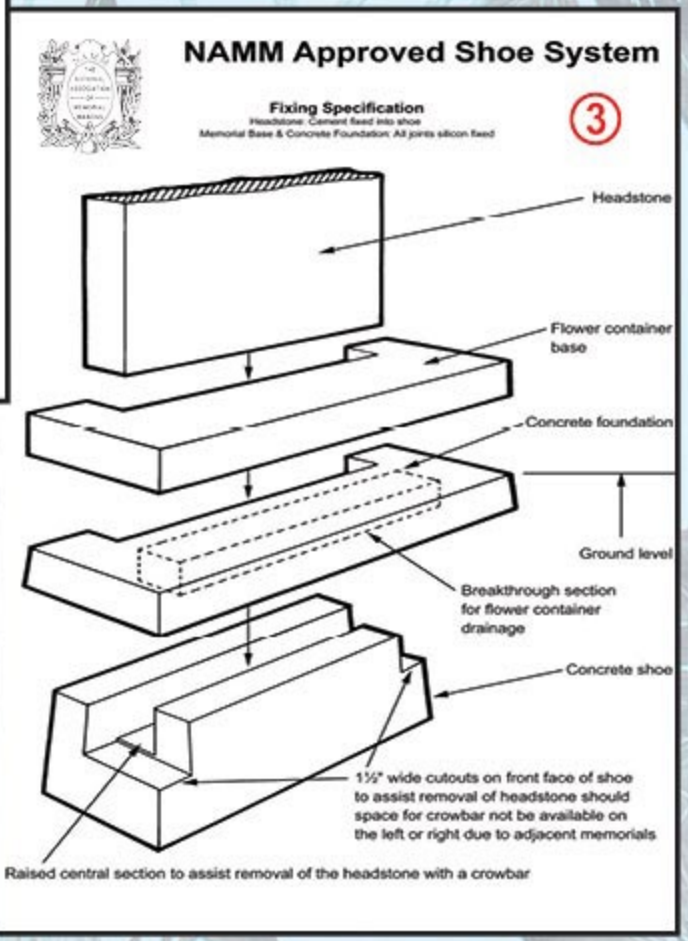
Your 10 year installation guarantee … why your memorial is fixed using a NAMM Approved Ground Support System

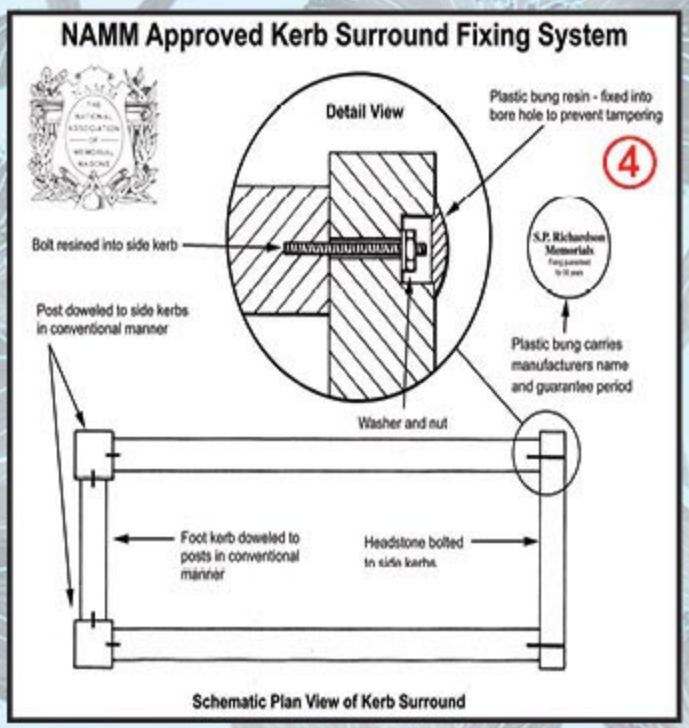
The strength and safety of memorials has been brought into the public arena in recent years due to accidents occurring within cemeteries. The concerns raised by these incidents have brought about changes in British Standards and as a result of this, The National Association of Memorial Masons member companies who install memorials within the industry have adopted a flexible Code of Working Practice for the fixing of memorials which can be reviewed and updated as circumstances dictate.

However, it has been recognised that the determined vandal will break a memorial if it cannot be pushed over, and for this reason no memorial fixing system can be described as completely vandal proof.

NAMM's Code of Working Practice Accredited Fixing Systems ensure that the memorial would be able to withstand the normal rigours of being subjected to all weather conditions and be able to withstand all reasonable forces that may be applied to it. Therefore, should the memorial fail as a result of force it would do so slowly in a manner that would not cause injury.







Several systems have been accredited, each for differing ground conditions. Please ask your Memorial Consultant for their advice as to which system would be applicable to you. Premium 30 Year Guarantees also available.

Please be aware that ground subsidence is not covered under this guarantee
